Cryogenic Gases

At EQUIGAS, we offer a complete line of supplies and equipment for handling cryogenic gases.

Best quality products that guarantee the safety and efficacy of your operation.

REGO®

RegO®, designs, manufactures, and tests a comprehensive portfolio of gas and liquid pressure controls, pressure regulating products, pressure relief devices, and a broad range of ancillary equipment.

Recognized world-wide for their innovative design, superior performance, and long service life, **RegO® products are found in a wide range of markets** including: industrial gas and liquids as well as alternative and renewable fuels such as LPG, LNG, and hydrogen.

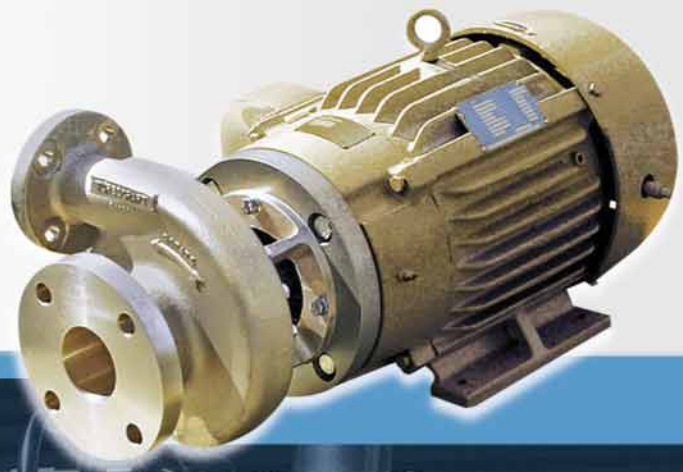

Leading manufacturer of centrifugal and reciprocating pumps for all cryogenic liquids.

Nikkiso ACD has the most diversified product line in the industry covering almost all applications requiring pumps or turboexpanders.

RECIPROCATING AND CENTRIFUGAL CRYOGENIC PUMPS

Equigas offers a wide range of cryogenic storage equipment manufactured by the leading companies in the gas industry.

**TANKS,
MICROBULKS
AND THERMOS.**

Hoses for cryogenic liquid transfers of the best brands that ensure maximum efficiency, complying with the highest quality and safety standards.

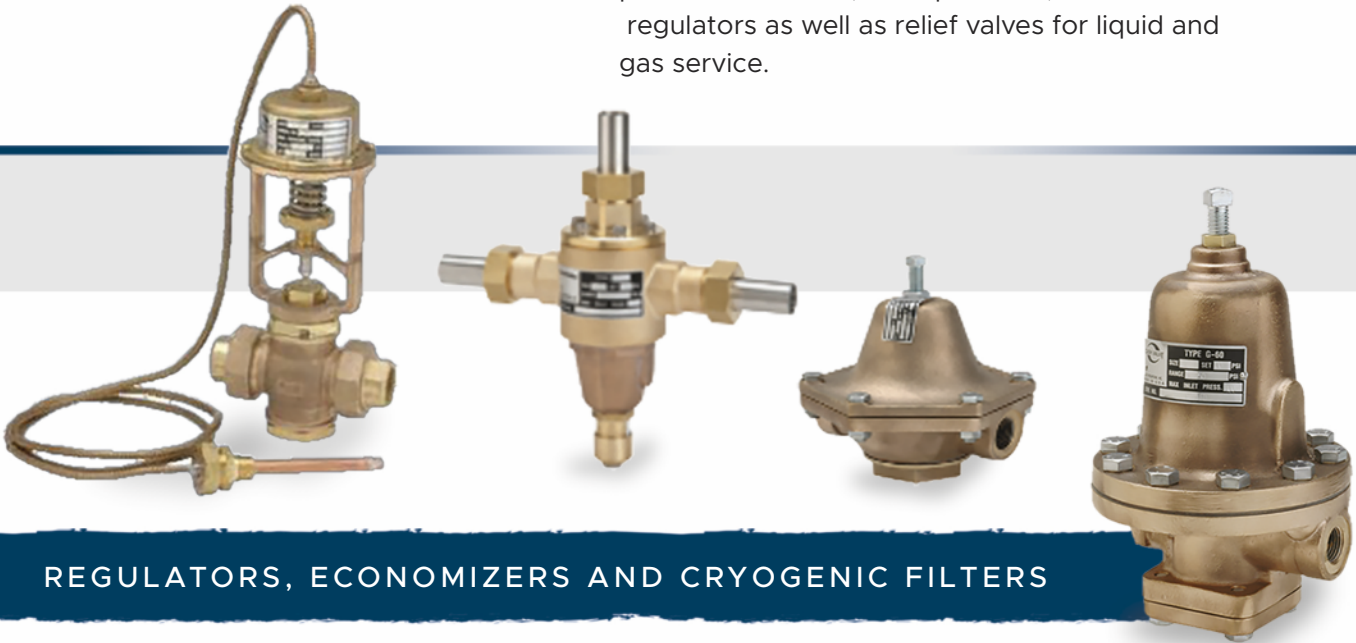

CRYOGENIC HOSES

Cash Valve is a leading manufacturer of pressure regulating and back pressure valves offering products for steam, air/gas, liquid, and cryogenic applications.

They offer a wide selection of pressure builders, pressure reducers, back pressure, and economizers regulators as well as relief valves for liquid and gas service.

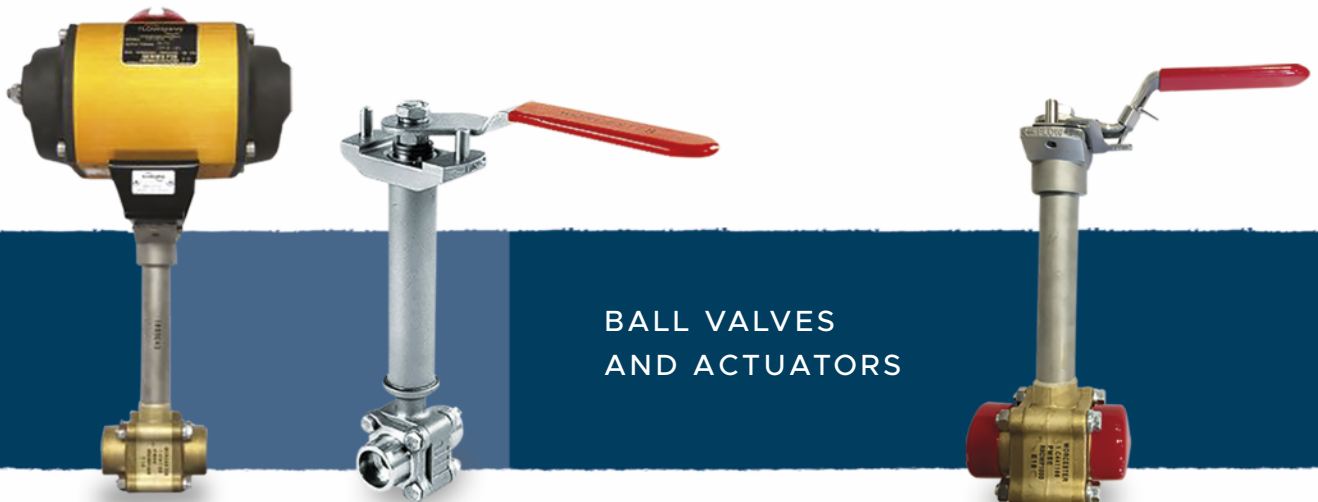

REGULATORS, ECONOMIZERS AND CRYOGENIC FILTERS

Long service life and safe operation in heavy-duty from cryogenic to highly corrosive liquids.

The driving factors behind each design are maximum safety and environmental protection, which are achieved through the use of corrosion-resistant materials, combustion testing, explosion-proof stems, and hermetic sealing functions.

BALL VALVES AND ACTUATORS

CEXI designs, manufactures, and installs a complete line of vaporizers and accessories for all types of cryogenic and non-cryogenic special fluids.

Their in-house engineering and manufacturing capabilities provide a wide range of solutions to meet the needs of vaporization and related activities.

Meets NFPA and FDA requirements for the systems.

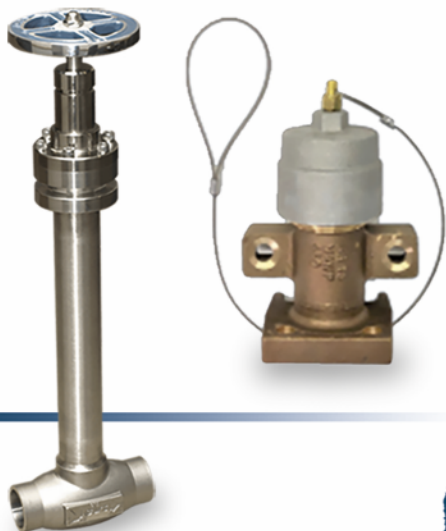

AMBIENT VAPORIZERS

Acme Cryogenics offers a wide range of reliable connections to be utilized for the safe transfer of cryogenic liquids (LIN, LOX, LAR, CO2, NITROUS OXIDE AND LNG), fully compatible with CGA V6.

Acme valves are designed for less heat leakage and faster cooling times.

They comply with ASME B16.34 and CSA B51 and offer canadian registration numbers throughout Canada.

VALVES AND CONNECTORS CGA

It is one of the most certified manufacturers of valves and pipe fittings in the world.

The line of accessories and adapters for pipes and hoses are designed to guarantee a hermetic seal.

CONNECTORS AND ACCESSORIES FOR TUBING

World experts in the design and manufacture of cryogenic valves for transport, storage and processing of ultra-low temperature liquefied gases.

Parker Bestobell's range of cryogenic valves are used with numerous cryogenic gases and applications including static storage tanks, environmental control, medical gas management and gas handling systems on LNG carriers.

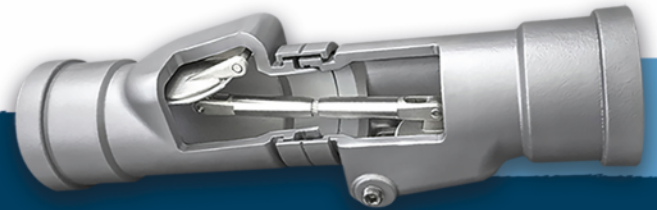

VALVES, ACCESSORIES AND CONNECTORS

The Smart-Hose® safety system adds an extra layer of protection inside the hose assembly, the weak link in your operation.

Smart-Hose's decoupling safety system (LL3-B) is designed to protect your facility against the potentially devastating consequences associated with detachment incidents.

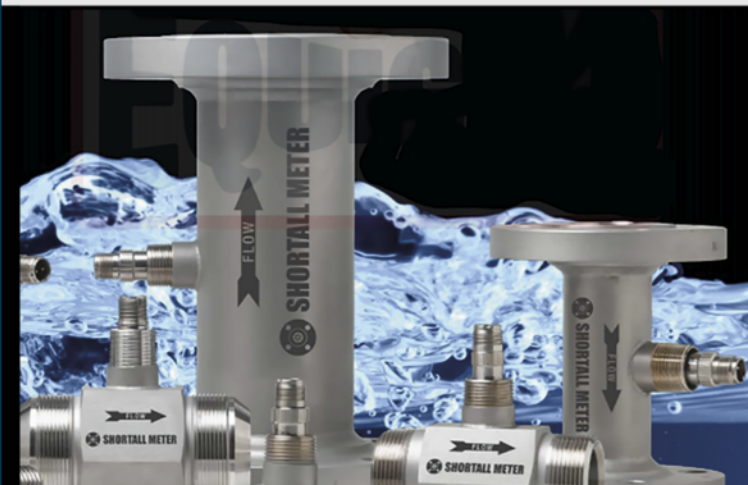

SAFETY CONTROL HOSES

Offers a complete range of pressure relief solutions for the chemical, refining, offshore oil and gas, biotechnology and food industries.

RELIEF DEVICES, THREADED SUPPORTS, BURSTING DISCS

CRYOGENIC FLOW METERS

Manufacturer and supplier of precision turbine meters and associated controls.

Shortall-Meter offers flexibility for reliable and accurate measurements. From the measurement of cryogenic liquids, refined fuels, sanitary, food and pharmaceutical applications, to water and most gases.

One of the first companies to offer a liquid filled pressure gauge.

Noshok has a wide range of instrumentations such as: transmitters, transducers/indicators, pressure switches, bimetallic thermometers, manifold valves, needle valves, and differential pressure measurement.

MANOMETERS AND THERMOMETERS

Mid-West[®]
Instrument

Mid-West Instrument offers products and services for customers throughout the entire distribution and supply chain.

LEVEL INDICATORS

FIBA manufactures a wide range of products including vaporizers, seamless pressure vessels and tubes, tube trailers and ISO skids, as well as cryogenic tanks and trailers.

VAPORIZERS AND ISO TANKS
