

Your Solution

IN THE GAS INDUSTRY

Lng Equipment

www.equigasinternational.com

LNG equipment

At EQUIGAS, we offer a complete line of supplies and equipment for small-scale LNG handling.

Products of the best quality that guarantee safety and efficiency of your operation.

REGO®

RegO is the leading manufacturer of gas control for the liquid industry cryogenics and industrial gases around the world.

RegO manufactures a wide variety of liquid and gas pressure controls, pressure regulator products, pressure relief devices and an extensive range of ancillary equipment.

LNG REFUELING STATION EQUIPMENT

Acme Cryogenics offers a wide range of cryogenic liquid transfer connections and vacuum-packed piping systems for safe and reliable use in LNG applications.

Cryogenic valves designed for reduced heat and faster cooling times.

They comply with ASME B16.34 and CSA B51 and offer Canadian registration numbers throughout Canada.

Vacuum packed piping systems offer the most efficient solution for LNG transfer.

VALVES AND CRYOGENIC HOSES

CEXI designs, manufactures and installs a complete line of vaporizers and accessories for all types of specialty fluid requirements cryogenic and non-cryogenic needs.

It has the manufacturing and in-house engineering capabilities to offer a wide range of solutions to meet the needs of vaporization and related activities.

GAS WATER BATH VAPORIZERS

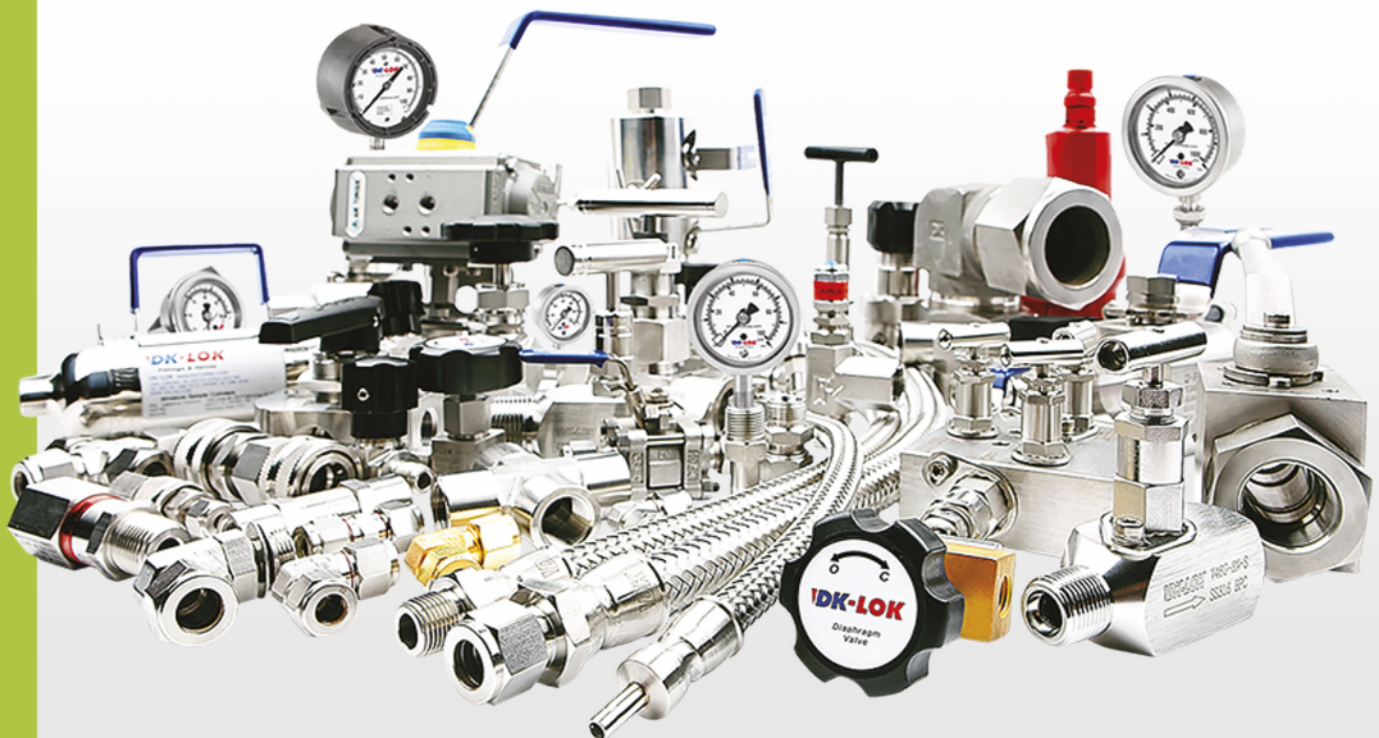

DK-LOK

DK-LOK® is one of the world's most certified manufacturers of valves and pipe fittings. DK-LOK® valves and fittings are manufactured with the strictest industry standards.

Its guarantee is a hermetic seal in process, instrumentation and power applications.

VALVES, FITTINGS AND ACCESSORIES

CIMC ENRIC

CIMC ENRIC is dedicated to design, development, engineering and sales, as well as the provision of technical maintenance services for a wide range of conveying, storage, and processing equipment used in the energy, chemical and liquid food industries.

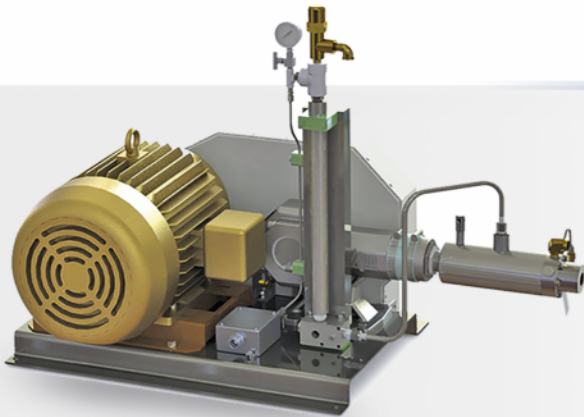

CRYOGENIC TANKS,
MICRO TANKS, ISO TANKS

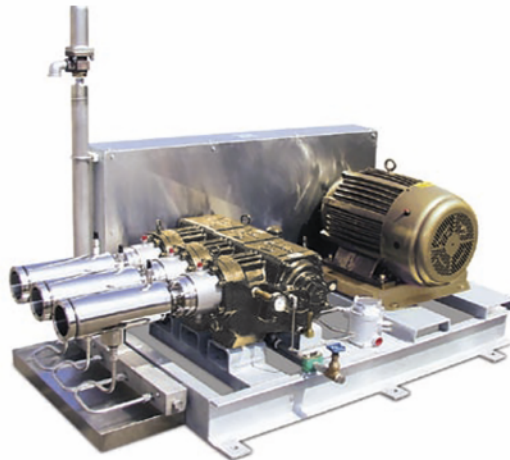

Leading manufacturer of centrifugal and reciprocating pumps for all cryogenic liquids.

Nikkiso ACD has the most diversified product line in the industry covering almost every application requiring pumps or turboexpanders.

Nikkiso offers a wide range of pumps for use in LNG applications such as filling, refueling, trailer refueling, liquid transfer, marine fuel systems and locomotives, cylinder filling, test benches, among others.

CENTRIFUGAL AND RECIPROCATING PUMPS

World experts in the design and manufacture of cryogenic valves for transport, storage and processing of ultra-low temperature liquefied gases.

Parker Bestobell's range of cryogenic valves are used with numerous cryogenic gases and applications including static storage tanks, environmental control, medical gas management and gas handling systems on LNG carriers.

PROCESS LINE VALVES AND ACCESSORIES

Long service life and safe operation in heavy-duty services, from cryogenic to highly corrosive liquids.

The driving factors behind each design are maximum safety and environmental protection, which are achieved through the use of corrosion-resistant materials, combustion testing, explosion-proof stems and hermetically sealed features.

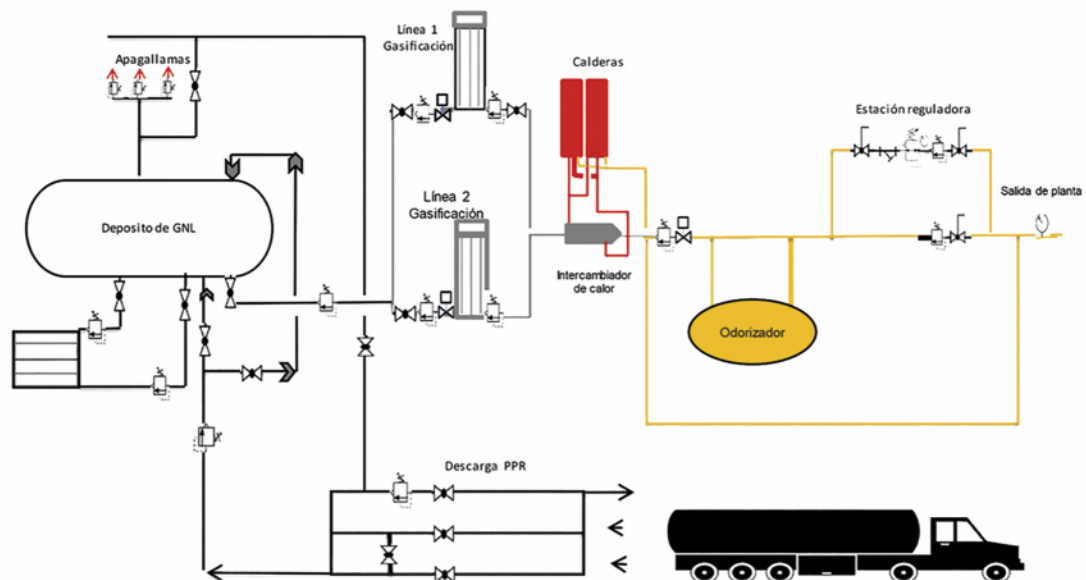

Hannay Reels is the leading manufacturer of hose and cable reels for OEM and aftermarket applications, offering thousands of standard models along with a wide range of custom design capabilities.

SOLUTIONS AND SYSTEMS REGASIFICATION

Equigas offers design and procurement services for regasification systems in compliance with the strictest international codes and standards, ensuring maximum safety and operational efficiency.
